

Using clear, unmounted stamps with acrylic blocks *Don't use Stazon ink, it can make clear stamps go hard*

Here's a stamp, as it comes to you

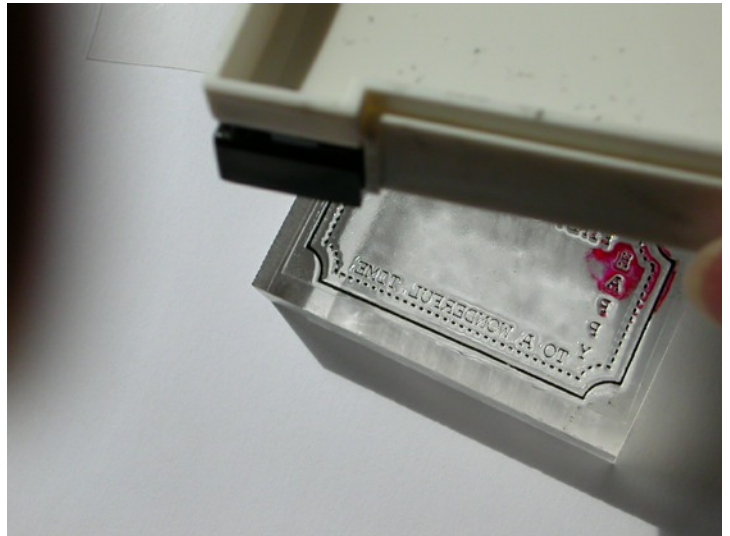

Here's a clear acrylic block, dirty, with red paint on

1. Remove the clear backing from the stamp. Press the smooth side of the stamp onto the acrylic block, it will cling by itself

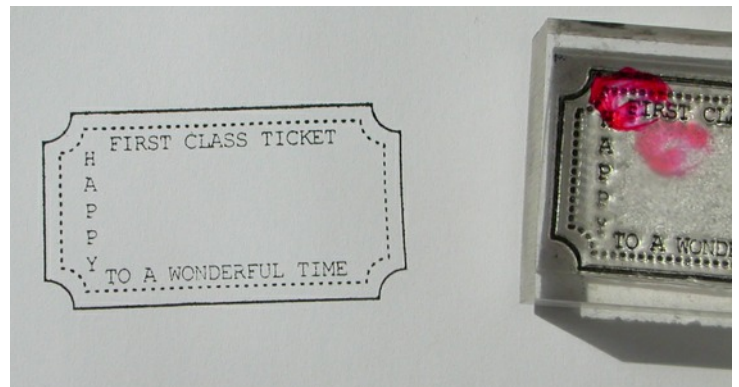

2. Lay the block onto a hard surface and tap the ink pad gently all over the stamp, so that there are no blobs of ink

3. Turn the block over and press the inked stamp gently onto your paper or card.

Voila!

Peel the stamp off the block and rub the stamp under a running tap to clean the ink off. You can use dishwashing liquid if you wish. Store out of light.
